Re: San Jacinto River Waste Pits Superfund Site
TCRA Weekly Progress Report No. 025 for April 25-29, 2011;
U.S. EPA Region 6, CERCLA Docket No. 06-12-10

Project Number: 090557-01

Dear Mr. Leos:

Attached please find TCRA Weekly Progress Report No. 025 for April 25-29, 2011.

This report was prepared on behalf of the International Paper Company and McGinnes Industrial Maintenance Corporation for the San Jacinto River Waste Pits Superfund Site in Channelview, Texas. Should you have any questions, please contact me at (228) 818-9626 or email me at dkeith@anchorqea.com.

Sincerely,

John P. Laplante for David C. Keith
Project Coordinator

TCRA Weekly Progress Report No. 025
Submitted May 2, 2011
San Jacinto River Waste Pits Superfund Site
USEPA Region 6, CERCLA Docket No. 06-12-10
Channelview, Texas

This weekly progress report is submitted pursuant to the Administrative Settlement Agreement and Order on Consent for Removal Action: CERCLA Docket No. 06-12-10, Channelview, Texas, which became effective on May 11, 2010 (AOC). The Respondents are International Paper Company (IP) and McGinnes Industrial Maintenance Corporation (MIMC).

A. Summary of Work Performed – Dates: April 25-29, 2011

The Respondents, Anchor QEA, and USA Environment, completed work on the following tasks:

- Submitted TCRA Weekly Progress Report No. 024 on April 25, 2011.
- Construction Activities
 - Continued to receive, stockpile, and manage armor cap aggregates at the LaBarge Site.
 - Continued to receive, stockpile, and manage Armor Cap aggregates within the Texas Department of Transportation (TxDOT) right of way (ROW) Laydown and Stockpile Area.
 - Continued to place geotextile and Armor Cap A and C aggregate in the Eastern Cell of the San Jacinto River Waste Pits (SJRW) via land-based operations.
 - Commenced and continued to place geotextile and Armor Cap B/C aggregate in Western Cell of the SJRW via land-based operations
 - Continued placement of geotextile and Armor Cap A, C, and D material in the Eastern Cell of the SJRW via water-based operations.
 - Continued to maintain the turbidity curtain.
- Continued development of an approach to working in the Western Cell based on the results of bench-scale stabilization testing.
- Continued to perform visual monitoring of water quality to evaluate potential construction-related turbidity impacts as described in the Final Removal Action Work Plan (RAWP). No water quality issues were noted based on these visual observations over the past week.
- Continued to maintain the Administration Site.

TCRA Weekly Progress Report No. 025
Submitted May 2, 2011
San Jacinto River Waste Pits Superfund Site
USEPA Region 6, CERCLA Docket No. 06-12-10
Channelview, Texas

- Continued to implement site security measures as described in the Site Security Plan.

Attached is a figure that depicts the approximate limits of initial cap material placement, subject to the engineer's final verification survey upon completion of the project.

B. Summary of Agency Communications

The written communications between the Respondents and USEPA, including and subsequent to the issuance of the RAWP, are summarized in the attached Table 1.

C. Summary of Sampling Results

None for this report.

D. Problems, Delays, and Solutions

The turbidity curtain is potentially subject to movement due to the currents and tides. The contractor is performing ongoing maintenance of the turbidity curtain on an as-needed basis.

Respondents continue to dispute USEPA's allegations contained in USEPA's Notices of Violations dated January 14, January 21, January 24, and on April 4, 2011, submitted an additional notice of dispute to USEPA with respect to USEPA's Notice of Violation dated March 3, 2011, and certain statements contained in two other letters from USEPA dated March 3, 2011. They also dispute USEPA's rejection by letter dated February 16, 2011, of their force majeure claim, and submitted a Notice of Dispute to USEPA on March 18, 2011, in response to that letter.

Access into the Western Cell and Eastern Cell of the SJRWP from the upland has been hampered by soft soil conditions. The contractor continues to evaluate alternate approaches, equipment, and materials, to facilitate construction of the cap in these areas. USEPA observed soil displacements resulting from construction activity on these soft soils and submitted a letter on April 8, 2011, to the Respondents regarding this matter. The Respondents and their contractor responded to USEPA's letter on April 15, 2011, proposing methods to manage these issues. The Eastern Cell of the SJRWP will be accessed from the water-side to the greatest extent possible to minimize the potential for soft sediment displacement associated with construction activities. The contractor continues to develop an approach for access in the Western Cell of the SJRWP.

USEPA Region 6, CERCLA Docket No. 06-12-10
Channelview, Texas

E. Projected Work for the Next 2 Weeks – Dates: May 2-13, 2011

The Respondents, Anchor QEA, and USA Environment, expect to complete the following tasks in the next 2 weeks:

- Provide USEPA with the contractor's alternative method for construction access in the Western Cell.
- Based on discussions with USEPA regarding the results of the additional water quality data collection conducted to evaluate the potential for construction-related turbidity impacts, continue to develop a summary report of the data collected during water quality monitoring.
- Ship additional natural stone aggregate from the quarry to Texas City. This material will be stored in Texas City until space becomes available at the LaBarge Site, or within the Laydown and Stockpile Area constructed in the TxDOT ROW.
- Continue to implement the Site Security Plan.
- Maintain the Administration Site as necessary.
- Continue to receive, stockpile, and manage armor cap aggregates at the LaBarge Site and TxDOT Laydown and Stockpile Area.
- On the TxDOT ROW, proceed to haul vegetation, debris, and soil that were cleared from beneath the I-10 Bridge for off-site disposal.
- On the SJRWP:
 - Continue preparation of the Western Cell of the SJRWP surface for cap construction.
 - Receive imported fill at SJRWP and place in low-lying areas in the Western Cell.
 - Continue installation of armor cap in Eastern Cell of the SJRWP.

F. Schedule

Attached is the approved project construction schedule, which is being included as directed by USEPA in a letter from Valmichael Leos to David Keith of Anchor QEA dated February 10, 2011. The approved construction schedule is out of date, as it references armor cap materials whose designations have now changed (as explained in the recently approved RAWP) and includes "start" and "finish" dates for these materials that are no longer applicable since the sequencing of placement of the construction materials has also changed, as explained in the approved

TCRA Weekly Progress Report No. 025

San Jacinto River Waste Pits Superfund Site
USEPA Region 6, CERCLA Docket No. 06-12-10
Channelview, Texas

RAWP. Note that armor cap material designations referred to above are based on the recently approved RAWP.

A proposed updated project construction schedule, based on Respondents having obtained access to the TxDOT ROW, and secured a lease for a laydown area and dock facility, was transmitted to USEPA on February 14, 2011. Respondents prepared the updated project construction schedule pursuant to USEPA's direction, and it further revises and updates the schedule presented and submitted to USEPA at a January 31, 2011, meeting. On March 3, 2011, USEPA provided a letter indicating the proposed schedule is not approved and invited Respondents to request a meeting with USEPA if desired. A meeting with USEPA regarding the schedule took place on March 24, 2011, and based on that meeting, the Respondents did not submit a revised schedule. Respondents anticipate that this matter will be reviewed with USEPA in June/July 2011.
